

TEST SUMMARY REPORT

Project Details

Project Name: Craftyfy

Test Type: Manual Testing

Application Type: Web Application

Test Environment: Chrome

Test Status: Completed

Test Objective

The objective of this test cycle was to validate the end-to-end functional behavior of the Craftyfy web application. The testing focused on verifying whether the application meets the defined requirements and ensures a stable, user-friendly experience across critical modules such as authentication, product browsing, cart operations, order placement, and navigation.

Scope of Testing

In Scope

- User Registration and Login
- Product Browsing and Filtering
- Cart Management
- Order Placement and Order History
- User Navigation, Profile, and Footer Links

Out of Scope

- Admin Product Management
- Inventory Management
- Real Payment Transactions
- Stress and Load testing

Test Execution Summary

- Total Test Cases Planned: 26
- Total Test Cases Executed: 26
- Total Test Cases Passed: 16
- Total Test Cases Failed: 10
- Pass Percentage: 61.54%
- Fail Percentage: 38.46%

Defects Summary

- Total Defects Logged: 12
- High Priority Defects: 6
- Medium Priority Defects: 2
- Low Priority Defects: 4

Module-wise Test Observations

Login & Authentication:

- Forgot Password functionality is non-responsive.
- Logout button visibility issue observed on Home page.

Product Browsing & Filtering:

- Category filters such as Home Decor, Stationery, and Jewellery are not functioning correctly.
- Incorrect product mapping and missing images detected.

Cart Management:

- Add-to-cart confirmation message not displayed.
- Remove item icon is misleading but cart operations work correctly.

Order Placement:

- Order placed successfully but confirmation message not displayed.
- Phone number and ZIP code fields show spinner controls.

User Navigation:

- Profile, Explore Jobs, and Subscription features are visible but not functional.
- Footer links are not clickable.

Risks and Impact

- High-severity defects in authentication and product filtering may block critical user journeys.
- Missing confirmation messages can reduce user trust and lead to confusion.
- Broken navigation links negatively impact usability and overall application credibility.

Recommendations

Immediate Actions:

- Fix Forgot Password, Logout visibility, and product category filtering issues.
- Ensure confirmation messages are displayed for cart and order actions.

Functional Improvements:

- Validate backend data mapping for categories and product types.
- Ensure all navigation buttons and links have proper routing.
- Add Order IDs
